SUMMARY

Senior Shopify Developer with experience building scalable Shopify storefronts, custom Shopify apps, and API-driven e-commerce solutions. Skilled in Liquid, JavaScript ES6+, Shopify Themes, Metafields, Remix, Node.js, REST APIs, and GraphQL. Strong background in converting Figma designs into responsive storefronts, developing custom product and bundle functionality, and delivering tailored Shopify solutions for local and global brands.

EXPERIENCE

Senior Assistant Manager | Technical Development

SIAR DIGITAL

September 2024 - Present, Karachi

- Developed scalable Shopify storefronts using Liquid, JavaScript ES6+, Metafields, Shopify Themes, sections, and theme blocks, delivering custom product, variant, collection, pricing, and bundle functionality.
- Created and maintained **2+ Shopify apps**, including Bundle Studio and CartFusion Bundle, using Shopify CLI, Remix, Node.js, REST APIs, and GraphQL APIs to support custom business workflows.
- Converted **20+ Figma designs** into pixel-perfect, mobile-responsive Shopify storefronts and optimized theme logic, caching strategies, and API/database queries to improve storefront performance.

SENIOR SHOPIFY DEVELOPER

CQUARK

November 2022 - September 2024, Karachi, Sindh

- Developed **30+ custom Shopify websites** using HTML, CSS, JavaScript, Liquid, Shopify Themes, sections, and theme blocks.
- Built and customized **100+ Shopify storefront features** across product pages, variants, collections, and custom templates to meet client business requirements.
- Developed custom Shopify apps using Remix and Shopify CLI 3.0 to support scalable e-commerce solutions.
- Integrated **10+ third-party services and payment gateways** using REST and GraphQL APIs to enhance storefront functionality and user experience.

TRAINING, IIB IBM INTEGRATION BUS V10

ARCANA INFO

September 2022 - October 2022, Karachi, Sindh

- Completed **1-month professional training** in IBM Integration Bus v10, focusing on application, data, and service integration across enterprise systems.
- Practiced **5+ IBM Integration Bus concepts**, including XML handling, message flows, application integration, service connectivity, and data transformation.
- Learned middleware integration practices for connecting **3+ types of systems**, including applications, data sources, and services to improve enterprise communication workflows.

PROJECT

Bundle Studio – Shopify App

SIAR DIGITAL • apps.shopify.com/bundle-studio • May 2025 - June 2025

- Developed a custom Shopify bundle app within **2 months** using Remix, Shopify CLI, Node.js, REST APIs, and GraphQL to create flexible product bundle functionality for Shopify merchants.

- Built and configured **4+ bundle offer types**, including product bundles, quantity-based offers, cart-based bundles, and custom discount logic.
- Integrated Shopify APIs to manage **100+ products, variants, cart data, and bundle rules** across multiple Shopify storefront use cases.

CartFusion Bundle – Shopify App

SIAR DIGITAL • apps.shopify.com/cartfusion-bundle • November 2024 – Present

- Developed a custom Shopify bundle app within **2 months** using Remix, Shopify CLI, Node.js, Liquid, Metafields, REST APIs, and GraphQL to support automatic cart-based bundle conversion.
- Built **4+ bundle formats**, including Mix-and-Match, Multipacks, Frequently Bought Together, and Build-a-Box bundles to help merchants increase Average Order Value.
- Implemented smart metafield-based product grouping, automatic cart recognition, and backend management tools to support **unlimited product bundles** across Shopify storefronts.
